SIMPLIFY YOUR WORK.

5 of 17 easy features that simplify your work.

Editing.

Use our built-in online video editor to create a sequence. Define your takes with mark in and mark out and arrange them on the timeline. Add overlay graphics and background music to your sequence.

Rendering.

You can render the EDL you have created into a video format of your choice. ReelCloud comes with a built-in video rendering and transcoding engine.

Voice-over.

Record your voice-over directly with your web browser. Add voice-over to your sequence in the online editor.

Transfer.

You can transfer single files, multiple files and metadata to remote destinations such as Youtube, Vimeo etc.. ReelCloud comes with a managed file transfer engine. You can define your target destinations in our configuration pages.

Subtitles.

You can import, store and export subtitles in multiple formats. When editing you can add subtitles to your sequence. You can render the subtitles into your video or distribute them as an extra subtitle file.

NLE Support.

You can export your online edit (EDL and media) to a standard NLE system such as e.g. Adobe Premiere. You can download the edit package to your NLE station or transfer it to a shared storage.
